I'm an aspiring graduating student eager to take on a job as a programmer/developer. I am fairly skilled in developing algorithms and working behind the scenes, and I am confident in my ability to learn and adapt. I have some experience in front-end development and graphics design, but I'm more interested in back-end development.

Skills

- Experience in HTML, CSS, and JavaScript
- Experience in Programming Languages such as Python, Ruby, Java, and Processing (p5.js)
- Familiar with technologies such as Git, Github, and Heroku
- Confident in being able to learn and adapt to new languages/environments
- Fluent in English, and can understand Filipino

Education

JUNE 2006 – MARCH 2018

ICT / Brightwoods School, Angeles City

Graduated with Honors (AY 2017-2018).

JUNE 2018 – PRESENT

BSCS / Holy Angel University, Angeles City

Dean's Lister (1st and 2nd Semester AY 2019-2020, 2nd Semester AY 2020-2021).

President's Lister (1st Semester AY 2020-2021).

Projects

College Thesis / Test Bank Analysis and Recommender System for SOC Courses Using Collaborative Filtering Algorithm

Major thesis for college. A web application capable of recommending topics to study for students after completing a quiz using a collaborative filtering algorithm. Created the collaborative filtering algorithm and participated in documentation.

Hobbies & Interests

Interested in artificial intelligence, machine learning, and game development. Hobbies include casual programming, video games, and music-making.
